PERSONAL PROJECTS

RecipeBook ⬈
- This is a full stack project which I made using MERN stack.
- It **enables users to cook with helpful recipes**. It also helps users to improve life in the kitchen. Furthermore, it also enables users to create different diets using various recipes and save them to access them later.
- It also provides in-depth nutrition value of every recipe.

Weather App ⬈
- Made this live weather app using react and open weather API.
- Users can get each and every detail about the weather within a few seconds with just one click.

To do list ⬈
- This project is a Web application that can be used to add their daily tasks and notes.
- One can delete ,update and add tasks according to their personal goals.

E-commerce Website ⬈
- This is a full-stack web app that I made using MERN stack technology
- It includes all the basic features which a basic E-Commerce website must have like Login/Signup, Add to cart, Remove from the cart and many more.
- This app also keeps track of all information about its users like their login details and maintains information about what the user has added previously to their cart.
